## Onkyo tx-sr353 remote control wiring manual download

If this does not work, turn OFF the ARC function.If this is the case, listen to the TV audio after connecting this unit and the TV with an audio cable.In addition, this unit does not guarantee synchronized operation that allows the TV remote control to operate the volume (including mute). Refer to the relevant device's instruction manual for details. Blinks when an HDMI signal is selected and selected HDMI input is not provided.23DIR.Lights when the DIRECT mode is switched on (page 24).17 1820 211915 152222 2316Page 6Controls and displays1162314Remote controls for operating other devices, the remote control codes for the Onkyo products are preset. - Press to access the Setup (page 27). Do not use different batteries together. -When disposing of used batteries, please comply with governmental regulations or environmental public institution's rules that apply in your country/area. -When inserting the batteries, make sure not to damage the springs on the battery's (-) terminals. Use / to select '4k60p'.3. Since this unit does not guarantee synchronized operation based on the CEC function, we recommend that you turn OFF the HDMI CONTROL setting on the connected player. The listening mode, sound volume or input name can be checked by selecting an input source.RECEIVERRECEIVERSURRSURRTREBLETREBLESDPSAUDIO SELAUDIO SELDISPLAYDISPLAYTURNERTUNEREDITEDIT SLEEPSLEEPTUNING TUNING +TUNING TUNING -PRESET PRESET -PRESET PRESET +LATE NIGHTLATE NIGHTTOP MENUTOP MENUBANDBANDQUICK MENUQUICK MENUCL/SATCL/SATSTRM BOXSTRM BOXBD/DVDBD/DVD12121314151634765891011Page 7Controls and displays1172314Loading the batteriesThe batteries included with the unit are to check initial operations; they may not last over a long period. Operations other than USB are not possible.4Receiver control buttonsQ (QUICK MENU) - Use to access the Audio options (page 25). This unit may not operate properly if the HDMI CONTROL on the player is ON. The settings cannot be changed.1RECEIVERSwitches the receiver between standby and on.2Input function buttonsUse to select the input source to this receiver (page 18). If you didn't connect a center speaker, choose NO (the center channel is sent to the other speakers).RECEIVERRECEIVERAUDIO SELAUDIO SELCL/SATCL/SATSTRM BOXSTRM BOXBD/DVDBD/DVDSURRSURK DSPSDSPOUICK MENUQUICK MENUSetup1.AccuEQ Room Cal.2.Manual SP Setup3.Input Assign4.Auto Power Down5.HDMI SetupReturn2.Manual SP SetupReturn a.Speaker SettingX.Overc.Channel Leveld.Speaker Distance2a.Speaker SettingFront CenterSurSubwoofer:Return NO II NO ] YESSMALLPage 23Before you startChecking what's in the boxPlease check that you've received the following supplied accessories. •Setup microphone•Remote control•AAA size IEC R03 dry cell batteries (to confirm system operation) x2•AM loop antenna•FM wire antenna•Quick start guide•Safety BrochureInstalling the receiver•When installing this unit, make sure to put it on a level and stable surface. When the headphones are connected, there is no sound output from the speakers.10TONESwitches the display between Bass settings and Treble settings.11TONE +/-Press to change the settings while the Bass or Treble settings are displayed.12INPUT SELECTOR buttonsSelects an input source (page 18).13SETUP MIC jackUse to connect a microphone when performing AccuEQ Room Cal. Use / to select the signal to set. • 4:4:4 - Select this setting when connecting to a 4K/60p 4:4:4 24 bit compatible TV using HDMI. In order to start ARC operation, after connecting this unit to a TV with an HDMI cable, you will need to switch the input on the TV to the input mode required to connect to this unit.Then, you can select a TV program. •The ARC function may not operate even if the above conditions are met. Select SMALL to send the bass frequencies to the subwoofer. •Center - Select LARGE if your center speaker reproduces bass frequencies effectively, or select SMALL to send bass frequencies to the other speakers or subwoofer. If this is the case, listen to the TV audio after connecting this unit and the TV with an audio cable. •The CEC (Consumer Electronic Control) function may activate when the ARC function is turned ON, causing power to turn ON and OFF and the input to switch from one to another. - This is a quick and effective automatic surround setup (see Automatically setting up for surround sound (AccuEQ Room Calibration) on page 16). •Manual SP Setup-Speaker Setting - Specify the size and number of speakers you've connected (see below).X.Over - Specify which frequencies will be sent to the subwoofer (page 28).-Channel Level - Adjust the overall balance of your speaker system (page 28).-Speaker Distance - Specify the distance of your speakers from the listening position (page 29).-Input Assign - Specify what you've connected to the (CD) audio input (see The Input Assign menu on page 29). •Auto Power Down - Sets to automatically turn off the power when the receiver has not operated for several hours (see The Auto Power Down menu on page 29). •HDMI Setup - Set the audio return channel function and set the HDMI input signal to Standby Through output or not during standby (see The HDMI Setup menu on page 30).Manual speaker setupThis receiver allows you to make detailed settings to optimize the surround sound performance. After all connections are completed, insert the power cord into the wall socket.Setup1.AccuEQ Room Cal.2.Manual SP Setup3.Input Assign4.Auto Power Down5.HDMI SetupReturn5.HDMI SetupReturn a.ARCb.Standby Throughc.4k60p SettingOFF OFF Page 4 1:42314Controls and displaysFront panel1ION/STANDBY2BLUETOOTHSwitches to the BT Audio input3Remote sensorReceives the signals from the remote control (see Operating range of remote control on page 7).4Listening mode buttonsSTEREO - Switches to the STEREO mode (page 24).SURROUND - Press for standard decoding and to switch between the modes of Pro Logic II and NEO:6.DSP - Switches between the various surround modes (page 24).5Character displaySee Display on page 5.6HOME/ENTER/RETURN buttonsHOME - Use to access the Setup. Use /// and ENTER on the remote control to navigate through the screens and select menu items. Don't install it on the following places: - on a color TV (the screen may distort) - near a cassette deck (or close to a device that gives off a magnetic field). Press to exit the current menu. •Press at any time to exit the Setup.4Select the setting you want to adjust. •AccuEQ Room Cal. This will enable you to control other Onkyo components with the remote control.3USB control buttonsUse to select the listening mode. Blinks when a digital audio signal is selected and selected audio input is not provided.HDMI - Lights when an HDMI signal is selected. setup (page 16).14USB terminalUse to connect your USB mass storage device as an audio source (page 15).CDTURNERTVBD/DVDSTRM BOXCBL/SAT GAME USBSURROUNDSTEREOBLUETOOTHLISTENING MODEHOME ENTER RETURNTUNING PRESETDSPONEAV RECEIVER TX-SR353PHONESON / STANDBYMASTER VOLUMEUSBSETUP MIC5V/0.5A45168327910 1211 1413 Page 5Controls and displays1152314Display15Tuner indicatorsST - Lights when a stereo FM broadcast is being received in auto stereo mode (page 22).TUNE - Lights when a normal broadcast channel.PRESET - Shows when a preset radio station is registered or called.MEM - Blinks when a radio station is registered.kHz/MHz - Lights when the character display is showing the currently received AM/FM broadcast frequency.16Speaker indicatorsShows if the speaker system is on or not.SPA means the speaker system is on.SP means the speaker system is off.17Sleep timer indicatorLights when the receiver is in sleep mode (page 6).18PRESET information or input signal indicatorShows the preset number of the tuner or the input signal type, etc.19Character display Displays various system information.20DTS indicatorsDTS - Lights when a source with DTS encoded audio signals is detected.HD - Lights when a source with DTS-EX/PRESS or DTS-HD encoded audio signals is detected.96/24 - Lights when a source with DTS 96/24 encoded audio signals is detected.NEO:6 - When one of the NEO:6 modes of the receiver is on, this lights to indicate NEO:6 processing (page 24).21Dolby Digital indicators D - Lights when a Dolby Digital encoded signal is detected. Use HDMI connections for Setup. -If headphones are connected to the receiver, disconnect them. •You can't use the Setup when the USB input is selected.1Switch on the receiver and your TV.Press IRECEIVER to switch on.2Switch the TV input to the input that connects this receiver to the TV through the corresponding HDMI cable.3Press .The Setup appears on your TV. - Use to return to the display immediately previous when making settings5///, ENTERUse the arrow buttons when setting up your surround sound system (page 27).6Listening mode and component control buttonsDIRECT - Press to select Direct playback (page 24).STEREO - Press to select stereo playback (page 24).SURR - Press for standard decoding and to switch between the modes of Pro Logic II and NEO:6.DSP - Switches between the various surround modes (page 24).7BASS +/-, TREBLE +/-Use to adjust Bass or Treble. •These controls are disabled when the listening mode is set to DIRECT. •When the front speaker is set at SMALL in the Speaker Setting (or automatically via the AccuEQ Room Cal. It can also reduce the life or performance of batteries. •Incorrect use of batteries may result in such hazards as leakage and bursting. Use this unit to operate the volume (including mute). •Turn OFF the power and remove the power cord from the wall socket when connecting other devices or making connection changes to this unit. We recommend using alkaline batteries that have a longer life. •Do not use or store batteries in direct sunlight or other excessively hot place, such as inside a car or near a heater. The ARC function may not operate properly with other HDMI cables.1Select 'HDMI Setup' from the Setup.2Choose the 'ARC' setting you want.When a TV supporting the HDMI Audio Return Channel function is connected to the receiver, the sound of the TV can be input via the HDMI terminal. •ON - The TV's sound is input via the HDMI terminal. •OFF - The TV's sound is input from the audio input terminals other than HDMI inputs.3Choose the 'Standby Through' setting you want.When the receiver is in standby, the HDMI input signal selected here will be output to the TV by HDMI. •LAST - The HDMI input signal selected previously will be output. -BD/DVD, CBL/SAT, STRM BOX, GAME - The HDMI input signal selected here will be output. •OFF - Signal will not be output during standby. -If the Standby Through setting is not set to OFF, the power consumption during standby will increase.4Choose the '4k60p Setting' setting you want.If the TV to be connected using HDMI supports 4K/60p, you can switch the 4k60p setting in accordance with TV performance.1. Select an input terminal that you wish to change settings using /.2. Check the manual that came with the TV if you don't know how to do this.4The Input Assign menu (page 29)(When using connections other than the recommended connections.)The HDMI Setup menu (page 30)(When the connected TV supports the HDMI Audio Return Channel function.)85Use the on-screen AccuEQ Room Cal. Next, turn ON the power of this unit and then the TV, in this order. Home Audio Hi Fi Components Lifestyle Audio Speakers AV Receivers 6:272314SetupUsing the SetupThe following section shows you how to make detailed settings to specify how you're using the receiver, and also explains how to fine-tune individual speaker system settings to your liking. •The OSD will not appear if you have connected using the composite output to your TV. More high quality video images can be enjoyed. -When the HDMI cable does not support 4K/60p 4:4:4 24 bit (18 Gbps transmission), video image may not be output properly. The brightness can be controlled in four steps.16Switches the display of this unit. You only need to make these settings once (unless you change the placement of your current speaker system or add new speakers).These settings are designed to fine-tune your system, but if you're satisfied with the settings made in Automatically setting up for surround sound (AccuEQ Room Calibration) on page 16 are correct.1Select 'Manual SP Setup' from the Setup.2Select 'Speaker Setting' from the Manual SP Setup menu.3Choose the set of speakers that you want to set then select a speaker size.Use / to select the size (and number) of each of the following speakers. •Front - Select LARGE if your front speakers reproduce bass frequencies effectively, or if you didn't connect a subwoofer. It can be used easily after following the procedure below to make the connections and settings.The colors of the steps indicate the following:----- Required setting itemSetting to be made as necessaryConnecting the speakersWhere you place the speakers will have a big effect on the sound. •Placing the speakers (page 8)•Connecting the speakers (page 9)D2Connecting the componentsFor surround sound, you'll want to hook up using a digital connection from the Blu-ray Disc/DVD player to the receiver. •About audio outputs connection (page 11)•Connecting a TV and playback components (page 12)•Connecting antennas (page 14)•Plugging in the receiver (page 15)D3Power OnMake sure you've set the video input on your TV to this receiver. Observe the following precautions:-Never use new and old batteries together. -Insert the plus and minus sides of the batteries properly according to the marks in the battery case. -Batteries with the same shape may have different voltages. In these cases, set the HDMI terminal to 4:2:0.5When you're finished, press .You return to the Setup.Before starting ARC operationWhen starting ARC operation, put the TV and this unit in STANDBY mode after connecting this unit with the TV. setup) and the X.Over is set above 150 Hz, the subwoofer channel level will be adjusted by pressing BASS +/- (page 28).8TUNER control buttonsSee Listening to the radio on page 22.9AUDIO SELPress to select the audio input signal of the component to play back (page 18).10LATE NIGHTTurns ON and OFF the LATE NIGHT function (page 25).11M.OPTPress to restore CD quality sound to compressed audio sources (page 24).12Mutes/unmutes the sound.13VOL +/-Use to set the listening volume.14SLEPPress to change the amount of time before the receiver switches into standby (30 min - 60 min - 90 min - Off). In that case, select 4:2:0 to watch a 4K/60p 4:2:0 24 bit video image. •4:2:0 - Select this setting when connecting to a 4K/60p 4:2:0 24 bit compatible TV using HDMI.4. Press. If certain source devices that do not support 4K/60p 4:4:4 24 bit are used and the HDMI terminal is set to 4:4:4, video output from the source device may turn red, no audio may be output by the source device, or a 3D signal may not be output by some of the devices. This can cause batteries to leak, overheat, explode or catch fire. This may interfere with the sound - in direct sunlight- in damp or wet areas- in extremely hot or cold areas- in places where there is vibration or other movement- in places that are very dusty- in places that have hot fumes or oils (such as a kitchen)Flow of settings on the receiverThe unit is a full-fledged AV receiver equipped with an abundance of functions and terminals. D+ - Lights when a source with Dolby Digital Plus encoded audio signals is detected.HD - Lights when a source with Dolby TrueHD encoded audio signals is detected.PLI1 - Lights to indicate Pro Logic II decoding (see Listening in surround sound on page 24 for more on this).22SIGNAL SELECT indicatorsDIGITAL - Lights when a digital audio signal is selected. You can check the remaining sleep time at any time by pressing SLEEP once.15DIMMERDims or brightens the display. This can cause batteries to leak or overheat.Operating range of remote controlThe remote control may not work properly if: •There are obstacles between the remote control and the receiver's remote sensor. •Direct sunlight or fluorescent light is shining onto the remote sensor. •The receiver is located near a device that is emitting infrared rays. •The receiver is operated simultaneously with another infrared remote control unit.
